SAS course: This course is a Scholarly Inquiry Course. “Students will understand how knowledge is generated and disseminated through scholarship, and the importance of scholarship to society,” by addressing the following: (1) distinguish between personal beliefs and evidence; (2) evaluate credibility of source information; and (3) understand how knowledge is transmitted within a discipline, across disciplines, and to the public.

Text: WebAssign, the online homework system for our text, *Calculus Early Transcendentals, 14th* Edition, by Thomas, is required. We will cover Chapters 1-5 WebAssign includes an electronic copy of the text. You do not need a hard copy.

Calculators: Calculators are not permitted on in-class quizzes and tests. Graphing calculators will be helpful in class and for homework.

Homework: Homework, both online and written, will be assigned regularly and will be graded for correctness. I expect students to work all assigned homework problems. I encourage students to work together on homework, but any work that is graded must be a student’s own work. I will not accept a group solution to a problem. Assignments that are copied will result, at a minimum, in a grade of a zero on the assignment for all participants.
