

# Flag enumerations of matroid base polytopes

*Sangwook Kim*, George Mason University, Fairfax, VA – 22030,

## Abstract

We study flag structures of matroid base polytopes. We describe faces of matroid base polytopes in terms of matroid data, and give conditions for hyperplane splits of matroid polytopes. Also, we apply this to the cd-index of a matroid base polytope of a rank 2 matroid.

**Keywords:** matroid, polytope.
