**MATH 203-002 Fall 2018 Announcements**

1. Test 1 will take place on September 20th, 2018.
The problems will be related to Sections 1.2, 1.3, 1.4, and 1.5.

2. Test 2 will take place on October 23rd, 2018.
The problems will be related to Sections 1.7, 1.9, 2.1, 2.2, and 2.8.

3. Test 3 will take place on November 20th, 2018. The problems will be related to Sections 2.9, 3.1, 3.2, 3.3, and 4.7.

4. Despite the snow day of November 15, we will have Test 3 on November 20$^{th}$. Please pay attention to the following topics:

   a) Computing the coordinate vector of a given one,
   b) Using cofactor expansion in computing determinants,
   c) Using row reduction in computing determinants,
   d) Area of a parallelogram and an effect of applying a linear transformation,
   e) Finding the change-of-coordinates matrix from one basis to another.

5. Final exam will be related to the following sections:
1.9, 4.4, 5.1, 5.2, 5.3, 6.1, 6.2, 6.3, 6.4, 6.5.
