Place:	Innovation 206
Instructor:	Walter Morris
Office:	Exploratory Hall, Room 4207
Phone:	993-1481
Office Hours:	MTWR 12:45 - 2PM
e-mail:	wmorris@gmu.edu

Math 108 is a course in elementary calculus, with applications in business and other disciplines. The prerequisite for the course is a passing score on the Mathematics Placement Test or C or better in MATH 105 or MATH 112.

The text for the course is **Applied Calculus for Business, Life, and Social Sciences**, by Denny Burzynski, published by xyz textbooks. We will cover the first five chapters. There will be a one-hour exam on each Thursday of the first four weeks. Each of these exams will count for 17.5% of your final grade. The final exam is cumulative. It will be given on **June 16**, from 10:30AM until 1:15 PM. Two tenths of the final grade is determined by the final exam. There will also be homework to hand in, which will determine one tenth of the grade.

There is no class on May 30.

The web page for the class is

`http://math.gmu.edu/~wmorris/108hwsu16.html`

If you are a student with a disability and you need academic accommodations, please see me and contact the Office of Disability Services (ODS) at 993-2474. All academic accommodations must be arranged through the ODS.

There is a website http://www.xyzhomework.com associated with the textbook. You can go there and use the course ID **8756** to access practice problems (not graded) and instructional videos.

Feel free to come to my office if you have any questions. I check my e-mail daily, so you can also ask questions that way. Be certain that you understand all of the homework assigned and all of the assigned reading, and that you ask questions in or out of class in order to clear up any problems you might have. Bear in mind that the questions that you ask in class help not only you, but also the professor and all of the others who had the same questions but were afraid to speak up.
