Math 125 is a course in Discrete Mathematics. The goal of the course is to improve your ability to recognize and use some important mathematical structures, such as relations, set systems and graphs. The prerequisite for the course is a passing score on the Mathematics Placement Test or C or better in one of MATH 105, Math 108, or MATH 113.

There will be three in-class tests, which we will tentatively schedule for February 16, March 22 and April 19. Each of the in-class tests determines 20% of the final grade. The final exam is cumulative. It will be given on May 5, at 12:00 PM. Three tenths of the final grade is determined by the final exam. There will also be in-class quizzes, which will determine one tenth of the grade.

Spring Break is March 6 - 13.
The web page for the class is

If you are a student with a disability and you need academic accommodations, please see me and contact the Office of Disability Services (ODS) at 993-2474. All academic accommodations must be arranged through the ODS.

Feel free to come to my office if you have any questions. I check my e-mail daily, so you can also ask questions that way. Be certain that you understand all of the homework assigned and all of the assigned reading, and that you ask questions in or out of class in order to clear up any problems you might have. Bear in mind that the questions that you ask in class help not only you, but also the professor and all of the others who had the same questions but were afraid to speak up.
